

Hi - I am a listener to the K-LOVE station in the Dayton area. I benefit greatly from the upbeat and inspirational music as well as the thought provoking messages that may seem as mere comments. I feel that the simple and unassuming messages that K-LOVE broadcasts in its music and comments add to and enhance my local community with daily education and wisdom that we often tend to forget and overlook. The continual reminding and uplifting promotes a community that both sympathizes and empathizes with other people and other communities. I believe that this contributes to the success of disaster relief efforts (with monetary and physical help donated) as well as contributing to a thinking-feeling community that works towards a friendly community for everyone. I fear that if K-LOVE were to be displaced by an LPFM broadcaster that the efforts and positive affects would diminish as would the community support for relief efforts, fund drives, and possibly support for the local law enforcement. Please do not allow the LPFM to replace my local K-LOVE signal...I truly enjoy it!
